Marks: building elements of visible signs.

é char is built by two marks

I avoid the glyph word because
it's a modifier sign and
the dot in char i isn't glyph in Egnlish
abc but it's a glyph in Turkish.

A character is the smallest unit
of written language that carries meaning.

A character is the smallest unit
of written language that carries meaning.

Text block: A shape that contains
text informations only. Not necessarily a regular shape,
it can be a circle or a not regular area.

The analyser first step is to find the
start of the rows

Find Marks in the image

All text block has it's own background color
and all char has it's own text color.

Define baselines in the text,
n width, m width

Find characters based on Glyphs

Find lines and
text blocks
